IRONMAN®

Elevate your Comfort

An Adjustable Base is the perfect addition to your bedroom.

40+

The 40+ by Ergomotion is a unique solution for those who wish to have an adjustable installed in a platform bed. Often adjustable beds are either too high or not designed in a way that would allow use in a platform bed. The 40+ solves these issues with an ultra-low profile 4" height, and a zero-clearance design.

CONTOUR

The Ergomotion Contour base optimizes the shape of the mattress when in an elevated position, allowing users to rest comfortably. Less compression of the mattress means less compression on the user's midsection, resulting in a level of comfort beyond that of ordinary adjustable bases.

ELEMENT

You can make any bed an adjustable bed with the Element. The Element is one of the slimmest & finest adjustable bases on the market. Designed to integrate into existing bedroom furniture & elegant enough to stand on its own, the Element will make your bed so much more comfortable.
